PROJECTS

Clickora

Clickora is a decentralised ads marketplace where users can run ads of their product or display ads on their website, earn and spend in SOL.

Tech - Next.js, React.js, Javascript embedded snippets, Anchor, Redis, Web3.js, AWS-SDK, Node.js, TypeScript, Prisma and PostgreSQL.

- Redis caching for minimizing per-click/impression database load.
- Per-click authentication codes verified to prevent bot fraud
- Instant SOL deposit, withdraw and refund
- Contextual Ad-matching engine with scoring, caching, and serving.

Homifi

Homifi is a Property rental platform where owners list rentals and tenants browse and search them.

Tech - Next.js, React.js, NextAuth, Prisma, PostgreSQL.

- Built role-based auth (tenant/owner) with Google OAuth and NextAuth JWT sessions
- Designed a Prisma/PostgreSQL schema for listings, owners, and tenants
- Enabled owners to create and manage listings and tenants to browse and search them

Fastify-Backend-Optimized

A benchmark project comparing a Fastify server against a hand-optimized raw Node.js http server on identical CRUD workloads, isolating true framework overhead from implementation differences.

Tech - Node.js, Fastify, raw http module

Anchor-AMM

Constant-product AMM on Solana with liquidity pools, LP token minting, and swap/add/remove-liquidity instructions. (Anchor, Rust, Solana)

SKILLS

Frontend - Javascript, React.js, Next.js, Typescript

Backend - Node.js, Express.js, AWS, Git, Redis

Database - MongoDB, PostgreSQL, Prisma ORM

Web3 - Anchor, Chai, Web3.js, Rust

EDUCATION

Priyadarshani College (code:4123)

July 2023 to 2027

Nagpur, India | Final year in Industrial IoT
