ABOUT ME

Final-year IoT student specializing in building full-stack Web3 applications on Solana blockchain using Anchor framework

PROJECTS

Clickora

Clickora is a decentralised ads marketplace where user can run ads of their product or display ads on their website, earn and spend in SOL.

Tech - NextJs, Javascript embedded snippets, Anchor, Redis, Web3.js, Aws-sdk

- Redis caching for minimizing per-click/impression database load.
- Per-click authentication codes verified to prevent bot fraud
- Instant SOL deposit, withdraw and refund
- Contextual Ad-matching engine with scoring, caching, and serving.

Homify

Homifi is a property rental platform that connects tenants with available listings and enables anyone to list a property for rent.

Tech - NextJs, Javascript embedded snippets, Anchor, Redis, Web3.js, Aws-sdk

- Redis caching for less db request for every click and impression
- Authenticating every click to prevent click Bot
- Instant SOL deposit and withdraw
- Rent payment through SOL

Fastify-Backend-Optimized

A benchmark project comparing a Fastify server against a hand-optimized raw Node.js http server on identical CRUD workloads, isolating true framework overhead from implementation differences.

Tech - Node.js, Fastify, raw http module

Anchor-AMM

Constant-product AMM on Solana with liquidity pools, LP token minting, and swap/add/remove-liquidity instructions. (Anchor, Rust, Solana)

TECHNICAL SKILLS

- **Frontend** - Javascript, ReactJs, NextJs, Typescript
 - **Backend** - NodeJs, ExpressJs, Typescript
 - **Database** - MongoDB, PostgreSQL, Prisma ORM
 - **Web3** - Anchor, Chai, Web3.js, rust
-

EDUCATION

Priyadarshani Collage(**code:4123**),Nagpur | Final year in Industrial IoT | july 2023 to 2027
